

Wavespark

Cloud Solution

Manage your **Waves System players** now with our cloud service.

Wavespark is all about **optimization** and **performance**. This is the designated solution to **simplify** the management of a **fleet** of players. You can **set up**, **supervise** and **update** your shows, interactive contents and scenarios. All this thanks to a web interface available from **anywhere**. The solution has **proven itself** in immersive fitness rooms, restaurants and healthcare facilities. Wavespark is available **with** or **without** subscription!

Easy & centralized management

Centralize your update of your entire fleet from **a single** web interface. Connect **as many players** as you need. Get easy access to your players **settings, controls** and **firmware update**.

Deploy impactful content

Upload, organize and deploy meaningful contents : video, music, light shows, and web content.

Interactive scenarios

Let your creativity **run free!** You created engaging **scenarios?** You can **drag and drop** them directly in the cloud to deploy them immediately on your players.
